eBook Reader[/caption]

Over the years, I have learned more about eBook structure and components of an eBook. When it comes to the parts of an eBook, you need to do a little research on what readers expect from a standard eBook and how to attract the right people. For both fiction and non-fiction books, every chapter has its different header. Several other bells and whistles make an eBook standout. These parts include the use of multiple colors, fonts, sizes, etc.

Today, let's take a look at the parts of an eBook. Precisely every eBook has an eBook structure, that is what elements we should add to an eBook. The order of the components of an eBook can vary a little for both fiction and non-fiction. Whenever you download an eBook, this is what you should see in the order of arrangement:

Book Cover

The Book Cover. The book cover art, like the front cover of a printed book, is placed at the very start of the eBook.

Writing and The Written Word

Front Matter

- **First Page.** If your eBook is not a compilation, the product description should be on the very first page. That is the back-jacket copy. Why? It is merely because readers nowadays quickly forget about what most downloaded eBooks contain. Reminding your avid readers why they paid for the eBook on the First Page makes it easier for them to recollect. It also aids in figuring out what next to read. It is similar to picking a book from your library and reading the inner flap or back copy.
- **Copyright page.** Although, among the vital components of an eBook contained within in the front matter, Booklovers skip these parts of an eBook as it covers sample space.
- **Title page.** The title page comprises of the author(s) name.
- **Hyperlinked table of contents.** This link goes directly to the significant parts of an eBook, especially the ones mentioned here, excluding the cover art.
- **Dedication**, if any.
- **Acknowledgements,** if any. Although, amongst the vital components of an eBook included in the front matter, Booklovers skip these parts of an eBook as it covers sample space. When readers download a free sample of an eBook, they should get the significant eBook structure, not parts they would rather skip.

The Body of the Book

- **The eBook contents,** following the eBook structure of the table of contents with hyperlinked chapters/Section headers and subheaders. The Body of your book is the meaningful content of the book to your readers and constitutes the vast majority of the pages in your book.

Back Matter

- **Any extras.** The author afterword, or Q and A, or a small sample of the succeeding eBook in the series, etc. You should try to keep the excerpts short. Book lovers do not like the feeling of having more pages left unread, or some abrupt end with few extras left. So, avoid lengthy excerpts except you need it for the next sequel.
- **About the eBook** or the author(s) bio.
- **Bibliography.** If you have cited other authors, a bibliography recognizes these sources. Of course, attribute quotes are needed in the copy or with appendices. A bibliography also provides readers a list of references, if they wish to learn more about the subject.
- **Optional - Ads.** Single page ads, with cover art of your other eBooks. Or, if you have writing partners, you can exchange ads with them.

Conclusion

- And that is all for parts of an eBook. Some of the components of an eBook may appear obvious, but I do not see several authors placing their eBook description in front and a traditional front matter in back. Hyperlinks also aid the eBook structure, and this makes the eBooks easier to

read, find pages and move around. So, as writers, it is time to step up and make good use of the latest technological advancement available today.

Table of eBook Parts by Genre Category

PARTS OF AN EBOOK	FICTION	NON-FICTION
BOOK COVER	Required	Required
FRONT MATTER	Required	Required
TABLE OF CONTENTS	**Optional** - Table of contents present for few fiction eBooks	**Required** - Table of contents present for all non-fiction eBooks
BACK MATTER	**Optional**	**Optional** - Extra information like appendices, bibliographies, and notes
